

→ opens many links.

= also yahoo.
pref: MSN

now. More User friendly.
= more expressions.

- One messenger: No big reason to use it.
Highly recommended.
Use if separate.

- Want to use for: - Ask Qs on stuff does not understand.
- Group

✓ Expectation: logs. for assignment.
More than 2 ppl conversate.

- Visibility.

- Full Name
- List

= Pass

- Group by Class
- List by name w/ list of classes they take.

put mouse on name & see what courses.

- Picture of person for recognition.

Accessibility: - Color / B&W.
- Change Display
- Disable Color!

Interface: new type.
Able to get info on messenger.
Conversate window see ppl.
Group ppl.
Save Conversat / Board

* share app
- allow monitoring
- others are doing
ie prof can deny
✓ = additional
✓ all Univ comp
shows have
full features.

Expectat^o:

Basic Instructor Info

- Research.

- Schedule

- Picture

- Courses.

- Efficient
- be able to multitask w/ multiple programs running @ same time.

X BSOD.

Same for TA's.

Map to their office.

TA's hard to find.

- TYPE OF Computer, PC - Win xp.

Linux

Mac.

- Privacy Concerns: profs could have stats on what's going but not on personal communication
→ S/B personal.

all browsers

O/S supported

✓ by Ume.

Not HW/PS specific

Where: Home/School.

Customizatioⁿ:

- Gender.

- Optional info such as address.

- Big Color, font

No pink.

Com.: Voice/Video/Drawing board.
